1. Aim

To design and develop a Library Book Issue Management application in Zoho Creator by creating two Kanban reports and a dashboard using UI Builder, organizing book issue requests based on Book Category and Member Type.

2. Procedure & Architecture

Procedure Highlights:

1. Created Book_Issue_Request_Form with 13 Basic Field types and 4 logical sections.
2. Configured field validations and submitted 5 sample records.
3. Created **Book_Issue_Request_Report** in Kanban format grouped by Book Category.
4. Created **Member_Type_Request_Report** in Kanban format grouped by Member Type.
5. Created custom dashboard **Library_Issue_Dashboard** using UI Builder combining both reports with summary widgets, charts (bar, line, radar, pie), and status cards.

3. Components Summary

Component	Format / Grouping	Purpose
Book_Issue_Request_Report	Kanban, grouped by Book Category	Lets staff view requests organized by book categories (Mechanical, Compu
Member_Type_Request_Report	Kanban, grouped by Member Type	Organizes requests by who raised them (Student, Faculty, Staff) as separa
Library_Issue_Dashboard	UI Builder custom page	Consolidates Kanban reports, charts, and summary status widgets on one

4. Conclusion

The Library Book Issue Management application was successfully created in Zoho Creator with dual Kanban reports and a custom UI Builder dashboard, providing library staff with a structured and user-friendly management interface.
